Large gariands of brides roses depended from the bells to two Italian columns forming a bower which almost hid from the view the bridal party as it stood at the altar. The only music was that of the organ which gave out the notes of the Lohengrin wedding march as the procession entered the church doors.

At the same time Bishop Potter and Dr. Porter vestured for the service entered the chancel from the vestry, followed by the prince and Honore Palmer, a cousin of the bride, who acted as best man by proxy for Grand Duke Cyrl of Russia, who was unable to be present.

Until the country is more settled, an investigation of the mountainous regions of Kordofan and Darfur on the west and of the Abyssiniah frontier on the east would be impossible. Iron ore is found in the Bahr-el-Ghazal province and also in Darfur, while gold mines were at one time worked in the mountains south of Fazogl. Could coal be discovered, it would make a great change in the whole question of the Soudan. In a report received by the foreign office, Sir William Garstin has called attention to the need for a scientific examination of the Soudan, with a view to the development of its matural resources. In the Bahrel-Ghasel province, also, particularly in the Bongo country, large forest tracts exist.
